David N. Kennedy
NITRC Community Liaison
dave@dnkc.net

Dear David,

I am writing to acknowledge appreciation and support of the Neuroimaging Informatics Tools and Resources Clearinghouse (NITRC). These tools and resources, especially the cross-platform Diffusion Toolkit that does reconstruction, fiber tracking, visualization and analysis, have been helpful in saving steps and time. We are using it with our DTI data and appreciate the fast streamlined capability of this software and the intuitive interface. We are just beginning to use the real-time fiber track visualization and analysis, and think this is a wonderful additional tool.

We hope to use the tools and resources for more of our NIMH structural and functional neuroimaging research. In addition, we plan to build on the infrastructure provided by the NITRC to better support distributed neuroimaging data sharing as part of our data sharing objective of our NIMH Center grant P50 MH 079513.

I give my highest support of these efforts.

Sincerely,

B. J. Casey, Ph.D.
Sackler Professor and Director
Professor of Psychology in Psychiatry, Neurology and Neuroscience
